DETAILED ACTION

Election/Restrictions

1. Claims 1-73, 75-84, and 94-161 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7, received 02 November 2001.

2. This application contains claim s 1-73, 75-84, and 94-161 drawn to an invention nonelected with traverse in Paper No. 7. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

4. Claims 89-93 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1634

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. Claim 74 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. As presently worded, the compound of claim 74 can comprise, at a minimum, "a peptide chain approximately 12" amino acid residues in length. The claim, however, is seemingly contradictory in that the same peptide has the amino acid formula of SEQ ID NO: 208. A review of SEQ ID NO: 208 finds that it comprises not 12 amino acids but 17. The specification has not enabled the use of an oligopeptide of 12 amino acid residues in length when it is simultaneous stipulated that it comprises a sequence of at least 17.

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 74 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

9. As presently worded, the compound of claim 74 is a peptide that has at a minimum 12 amino acid residues. The claim seemingly contradicts this lower limit in specifying that the same compound has the amino acid formula represented by SEQ ID NO: 208. As noted above, SQ ID NO: 208 depicts an amino acid formula of 17 residues, not 12. It is unclear how an oligopeptide of 12 residues has a composition of 17.
